BootWay SEO & AI Search Audit

Oct 15, 2026 · @Someone · Site: www.bootway.in

Executive summary

Verdict: needs work. Nothing blocks Google or AI crawlers, but bootway.in is effectively one sales page, so it has almost nothing to rank or be quoted for beyond the brand name.

Biggest strength. The homepage is server-rendered, fast to read for any crawler, and packed with real proof: SMS Medical College, CK Birla and Mahatma Gandhi Hospital logos, the 1 Oct 2026 Dainik Bhaskar story (18 lakh+ sq ft mapped, LOI from SMS Hospital), ISO 27001:2022, DPIIT and PwD validation. Title, meta description, Open Graph and robots meta are all present.

Biggest weakness. Nine industries, virtual tours, pricing and press all live as `#anchors` on one URL. Google ranks pages, not sections, so "hospital navigation system" and "campus navigation" compete for the same single URL. The sitemap lists only 2 URLs, last updated Nov 2024.

Visibility check. bootway.in appeared in 1 of 10 test searches, only for a very specific query naming Sitapura and SMS Hospital, and that result was the duplicate `/landing.html`. Searches for "BootWay iNaaS", "BootWay indoor navigation Jaipur" and hospital wayfinding in India returned AIIMS Jammu's system, MapmyIndia's Iwayplus deal, AIIMS Delhi's Disha app and the AIIMS Bhopal QR system instead. The search tool used is not Google, so confirm in Google Search Console.

Top 3 priorities

1. **Split the one-pager into real pages:** one URL each for Hospitals, Universities & campuses, and 360° Virtual Tours first, then a case study per client. This is the single biggest lever for both Google and AI answers.
2. **Make BootWay a recognisable entity:** Organization + LocalBusiness schema with `sameAs` links, a Google Business Profile, listings on SourceForge, G2, Capterra, Crunchbase and Tracxn, and online links to the press coverage. AI assistants only recommend brands they can find described consistently in several places.
3. **Own one clear category in content:** "app-free, beacon-free indoor navigation for Indian hospitals." Publish FAQ, comparison and how-it-works pages that state this in quotable sentences, backed by the 18 lakh sq ft and SMS numbers.

Positioning: own "app-free hospital navigation in India"

BootWay should claim one category it can win: **QR-based indoor navigation for Indian hospitals and medical colleges, with no app and no beacons.** Expand to campuses, pilgrimage sites and factories only after that page cluster ranks.

Why this wedge is open

- The Indian systems that show up in search mostly need an app or hardware. AIIMS Jammu's system runs on Android/iOS apps with Bluetooth beacons, built with IIT Delhi (Digital Health News). Iwayplus relies on beacons and sensors, and MapmyIndia bought ~6% for ₹2 crore in Jan 2026 (Inc42).
- The closest match is academic, not commercial: AIIMS Bhopal and IIT Indore use QR codes that open a web map, plus a GPS app (Free Press Journal, Feb 2026). No vendor owns this phrase yet.
- The "best indoor navigation software" lists that AI assistants lean on leave BootWay out: Gitnux's 2026 top 10 and SourceForge's India indoor-mapping list (25 vendors) both list global players such as Mappedin and Mapsted instead.

Solution	Type	App needed	Extra hardware	Source
BootWay	Vendor, Jaipur	No, opens from QR in browser	No beacons	bootway.in
AIIMS Bhopal system	IIT Indore project	QR web map + GPS app	Not stated	Free Press Journal
AIIMS Jammu system	IIT Delhi project	Yes, Android/iOS	Bluetooth beacons	Digital Health News
Iwayplus	Vendor, New Delhi	Not stated	Beacons and sensors	Inc42
Accuras	Vendor, Germany	QR-led, positioning optional	Optional	Accuras blog

Messaging to use everywhere (site, LinkedIn, directories, press)

- **One-liner:** "BootWay gives hospitals turn-by-turn indoor directions that open from a QR code: no app, no beacons, in the visitor's language."
- **Proof line:** 18 lakh+ sq ft mapped · LOI from SMS Hospital · ISO 27001:2022 · DPIIT recognised · PwD-validated routes.

- **Category words:** lead with "indoor navigation" and "hospital wayfinding", which people search. Keep "iNaaS" as a secondary brand term; a search for "BootWay iNaaS" returned only Network-as-a-Service pages.
- **Drop "India's first" from the title** unless a public source backs it. Unverifiable superlatives earn no trust from Google's quality guidelines or AI answers; specific proof does.
- **Founder expertise as E-E-A-T:** an author page for Samarth (MBA, Hospital & Health Care Administration, IIHMR) makes hospital content more credible to Google and AI systems.

Technical SEO checklist

Crawling is open, but the sitemap, internal links and structured data give Google and AI crawlers almost nothing beyond the homepage. Four checks fail; none is hard to fix.

Check	Status	Details
XML sitemap	Fail	Only 2 URLs (`/` and `/policy`), lastmod 5 Nov 2024, made with a free generator. `/certifications` , `/research` and `/careers` are missing.
Structured data	Fail	No JSON-LD found on `/certifications` , `/research` or `/careers` , and none detected on the homepage. No Organization, LocalBusiness, Service or FAQ markup. Confirm in Google's Rich Results Test.
Internal linking / site depth	Fail	Main nav is `#anchor` links. Only 4 crawlable inner URLs, none about a product or industry. Footer link `#accredited` points to a section that doesn't exist.
llms.txt	Fail	`/llms.txt` did not return a file. Optional, but a cheap signal for AI tools.
robots.txt	Warning	Allows every crawler, including AI bots. But `Allow: /about/ /services/ /contact/` point to paths that don't exist, and the `Sitemap:` line uses `https://bootway.in/...` while the canonical host is `www` .

Check	Status	Details
Duplicate URL	Warning	`/landing.html` serves the same page and appears in search results. It canonicalises to the homepage; a 301 redirect is cleaner.
Host consistency	Warning	Canonical is `https://www.bootway.in`, `og:url` is `https://bootway.in`. Confirm `bootway.in` 301-redirects to `www`.
Canonical on inner pages	Warning	No canonical tag detected on `/certifications`, `/research` or `/careers`.
Headings	Warning	Homepage: one H1 with a clean H2/H3 tree. `/certifications` and `/careers` have no H1 at all.
Thin inner pages	Warning	`/certifications` ~60 visible words (the certificates themselves don't appear as text), `/careers` ~60 words, `/research` ~150 words.
Virtual tour subdomain	Warning	`lub.vt.bootway.in` is titled "BootWay Dashboard", described as "Indoor Navigation, Admin & Dashboard", has no crawlable text and no link back to the main site.
Image alt text	Warning	Logos and product screens have good alt text. The 9 industry images and the repeated logo strip have empty alt.
Page speed / Core Web Vitals	Warning	Not measured: PageSpeed Insights could not be reached from here. The autoplay hero MP4 is the likely LCP risk. Run PageSpeed Insights on mobile.
Careers page	Warning	Title "BootWay - Find Your Dream Job", meta "HR Portal for Job Applications". Footer calls a service "Virtual Assistance" instead of "Virtual Tour".
HTTPS	Pass	Served over HTTPS.
Robots meta	Pass	`index, follow, max-snippet:-1, max-image-preview:large` lets Google and AI Overviews quote freely.
Rendering	Pass	Homepage copy is in the HTML, so crawlers that don't run JavaScript (most AI bots) can read it.

Check	Status	Details
Contact details (NAP)	Pass	Email, phone and Sitapura address are on the page. Match them exactly on Google Business Profile and directories.

AI crawler & AI-search readiness

Every AI crawler is already allowed in, so access is not the problem. The gap is that bootway.in has little an AI can quote, and few other sites describe BootWay for it to cross-check.

How each AI surface finds you

Surface	Crawler token(s)	What it means for BootWay
Google AI Overviews & AI Mode	`Googlebot`	No special setup: a page only needs to be indexed and snippet-eligible (Google, updated 10 Dec 2025). Every SEO fix here is an AI Overview fix.
Gemini training & grounding	`Google-Extended` (control token, not a crawler)	Does not affect Google Search inclusion. Leave allowed so Gemini can learn about BootWay.
ChatGPT	`OAI-SearchBot` (search), `GPTBot` (training), `ChatGPT-User` (live fetch)	Allow all three.
Claude	`Claude-SearchBot`, `ClaudeBot`, `Claude-User`	Allow all three.
Perplexity	`PerplexityBot`, `Perplexity-User`	Allow both.
Apple, Meta	`Applebot`, `Applebot-Extended`, `meta-externalagent`	Allow.

Token list from Anagram's 2026 crawler guide. For a young brand, allowing training bots too is usually worth it: a model that never saw BootWay cannot recommend it. That is a business choice; the robots.txt in Ready-to-paste fixes allows them.

Readiness scorecard

Factor	Status	What to do
Crawl access	Good	Keep it. If the site sits behind Cloudflare or another CDN, check that its "block AI bots" setting is off, since it can override robots.txt.
Quotable content	Weak	Add a 40–60 word plain definition at the top of every page, FAQ blocks, and fact tables (sq ft, floors, languages, setup time).
Entity clarity	Weak	Add Organization + LocalBusiness JSON-LD with `sameAs`; use the exact same one-line description on LinkedIn, Crunchbase, Startup India and directories.
Third-party mentions	Weak	Dainik Bhaskar and Rajasthan Patrika coverage exists in print; link the e-paper or online versions. Get listed on SourceForge, G2, Capterra, GoodFirms, Tracxn.
Freshness	Weak	Sitemap last updated Nov 2024 and no dated articles. Publish and date at least two pieces a month.
Bing presence	Unknown	Verify in Bing Webmaster Tools (Bing powers Microsoft Copilot) and turn on IndexNow.

Prompts to test every month in ChatGPT, Perplexity, Gemini and Google AI Mode. Log whether BootWay is named, and which sites are cited instead:

1. Best indoor navigation system for hospitals in India
2. Indoor navigation without an app or beacons
3. Hospital wayfinding solution in Jaipur / Rajasthan
4. QR code based indoor navigation companies in India
5. How can a government hospital reduce patients getting lost in OPD?
6. 360 virtual tour company in Jaipur
7. Campus navigation system for universities in India
8. What is BootWay?

On-page issues

The homepage copy is good for visitors but tuned for no search phrase; inner pages are too thin to rank for anything. Exact replacement titles and descriptions are in Ready-to-paste fixes.

Page	Issue	Severity	Recommended fix
Home (Industries)	Nine industries get ~25 words each as H3s on one URL, so none can rank on its own.	Critical	Give each industry its own page (start with Hospitals, Universities, Virtual Tours), 800–1,200 words each, linked from the nav.
Home	Title is 68 characters, leads with generic "Indoor Navigation Solutions", spends space on "iNaaS" and an unsourced "India's First".	High	Use a 60-character title naming hospitals, campuses and "no app".
/certifications	No H1, ~60 visible words; the certificates are not on the page as text. Meta description ~170 characters.	High	H1 naming all three credentials; a short paragraph per credential (issuer, scope, date) plus the PDF link; trim the meta to 155 characters.
Home	H1 "Turn-by-turn directions inside your building" has no category keyword; "Indoor Navigation as a Service" sits above it as plain text.	Medium	Keep the line, but make the H1 "Indoor navigation for hospitals and large buildings" and move the current line to the subheading.
Home	Meta description is 162 characters and opens with the brand and "iNaaS".	Medium	Open with the benefit and keyword; end with a call to action; stay under 155.
Home (Pricing)	Three plans with no numbers or cost drivers. AI answers to "indoor navigation cost India" have nothing to quote.	Medium	Add what a typical project costs, or a "from" figure, plus what changes the price (sq ft, floors, languages).

Page	Issue	Severity	Recommended fix
Home (Press)	The Dainik Bhaskar story is an image with a translated headline; no link to the article.	Medium	Link the e-paper page and create a /press page listing every story with date and outlet.
Home (Virtual tour)	The only live demo is a skill-development centre, not a hospital.	Medium	Add a hospital tour demo once a client agrees; it matches the positioning.
/research	A list of 4 external links, no dates, no BootWay insight.	Medium	Turn it into a research summary: 5–6 cited findings on hospital wayfinding with what they mean for a hospital administrator.
/landing.html	Duplicate of the homepage that appears in search results.	Medium	301-redirect to `/`.
lub.vt.bootway.in	Title "BootWay Dashboard", no text, no link back.	Medium	Title "Virtual Tour: LUB Skill Centre, Sitapura | BootWay", one paragraph of text, a link to bootway.in.
Home	`og:image` is the logo, so link previews and some AI cards show no product.	Low	1200×630 image of the navigation screen in a hospital corridor.
Home	Industry images and the repeated logo strip have empty alt text.	Low	Alt like "Hospital indoor navigation on a phone"; mark the duplicate strip `aria-hidden`.
/careers	Title "Find Your Dream Job", no H1, footer says "Virtual Assistance".	Low	"Careers at BootWay | Indoor Navigation Startup, Jaipur"; fix the footer label; noindex login pages.
Home	`meta keywords` tag.	Low	Ignored by Google; safe to delete.

Keyword opportunities

The best openings are mid-competition hospital and "no app / no beacon" phrases plus local Jaipur terms, not the global head term "indoor navigation". Difficulty and opportunity are estimates from search results; no SEO tool is connected, so connect Ahrefs or Semrush, or check Google Search Console and Keyword Planner, for real volumes. "Not seen" means bootway.in did not appear when that phrase was tested here.

Keyword	Est. difficulty	Opportunity	Current ranking	Intent	Recommended content
hospital navigation system India	Moderate	High	Not seen	Commercial	Hospitals landing page
indoor navigation for hospitals	Moderate	High	Not seen	Commercial	Hospitals landing page
hospital wayfinding solution	Moderate	High	Not seen	Commercial	Hospitals page + wayfinding guide
QR code indoor navigation	Easy–moderate	High	Not seen	Commercial	How-it-works page
indoor navigation without app	Easy	High	Not checked	Commercial	Comparison page
indoor navigation without beacons	Easy–moderate	High	Not seen	Informational	QR vs beacon vs UWB comparison
360 virtual tour company Jaipur	Easy–moderate	High	Not seen	Transactional	Virtual tour service page + Google Business Profile
indoor navigation company in India	Moderate	High	Not seen	Commercial	Homepage + About page
hospital navigation Jaipur / Rajasthan	Easy	High	Not checked	Commercial	SMS / CK Birla case studies
campus navigation system for universities	Moderate	High	Not checked	Commercial	Universities page
patients getting lost in hospital OPD	Easy	Medium	Not checked	Informational	Guide for hospital administrators
wheelchair accessible route in hospital	Easy	Medium	Not checked	Informational	Accessible routing page (PwD validation)
indoor navigation cost India	Easy	Medium	Not checked	Commercial	Pricing explainer
digital wayfinding for hospitals	Moderate	Medium	Not checked	Informational	Blog post
hospital signage vs digital wayfinding	Easy	Medium	Not checked	Informational	Comparison post

Keyword	Est. difficulty	Opportunity	Current ranking	Intent	Recommended content
hospital signage NABH	Moderate	Medium	Not checked	Informational	Admin guide (quote the standard's exact clause)
factory / industrial plant wayfinding	Easy	Medium	Not checked	Commercial	Factories page (Sitapura industrial area angle)
temple / pilgrimage site navigation	Easy	Medium	Not checked	Commercial	Religious places page
exhibition / expo wayfinding India	Easy–moderate	Medium	Not checked	Commercial	Events page
mall indoor navigation India	Moderate	Medium	Not checked	Commercial	Malls page
indoor navigation (head term)	Hard	Medium	Not checked	Mixed	Pillar guide "What is indoor navigation"
wayfinding solutions India	Moderate	Medium	Not seen	Commercial	Homepage + industry pages
airport indoor navigation India	Hard	Low	Not checked	Commercial	Later, after hospital cluster ranks
indoor positioning system	Hard	Low	Not checked	Informational	Glossary entry
indoor navigation as a service / iNaaS	Easy	Low	Not seen	Navigational	Glossary entry; keep as brand term

Content gaps

BootWay has decision-stage proof (logos, press, certificates) but no awareness or comparison content, which is exactly what AI assistants quote. Build one hospital topic cluster first: a pillar page plus the spokes below, all linking to each other.

Topic	Why it matters	Format	Priority	Effort
Hospital indoor navigation (pillar)	Core buyer search; Accuras and others already publish on it	Landing page, 1,000+ words, FAQ block	High	Moderate (half day)
SMS Medical College / Dhanvantri OPD case study	Named, numbered proof is what AI answers cite	Case study with sq ft, floors, languages, outcome	High	Moderate

Topic	Why it matters	Format	Priority	Effort
CK Birla Hospital case study	Private-hospital proof for private buyers	Case study	High	Moderate
QR vs beacons vs app: which suits Indian hospitals	Owns the wedge in one page; Accuras's QR article (Sep 2025) shows the topic draws content	Comparison page with a table	High	Moderate
FAQ hub	Direct answers to cost, setup time, languages, accuracy without beacons, data security, updates	FAQ page + FAQPage schema	High	Quick win (1–2 hours)
360° virtual tours, Jaipur	Local, transactional, lower competition	Service page + Google Business Profile service	High	Moderate
Universities & campuses	RUHS is a client; parents and students search campus maps	Landing page	Medium	Moderate
How BootWay works	Turns the 3-step section and hero video into an indexable page with transcript	Page + VideoObject schema	Medium	Quick win
Press & media	Entity proof for Google and AI; links print coverage online	Press page	Medium	Quick win
Research summary	Converts the link list into cited findings administrators can use	Rewrite of /research	Medium	Moderate

Topic	Why it matters	Format	Priority	Effort
Hindi hospital page and FAQ	Coverage is in Hindi papers; few rivals publish Hindi wayfinding content	Hindi pages with hreflang	Medium	Substantial (multi-day)
OPD wayfinding checklist for administrators	Top-of-funnel lead magnet; captures emails	Downloadable guide	Medium	Substantial
Accessible routing	PwD validation is a differentiator few competitors claim	Page	Medium	Moderate
Factories, religious places, events pages	Low competition; Sitapura industrial area is next door	One landing page each	Low	Moderate each
Glossary (wayfinding, indoor positioning, iNaaS)	Captures definitional queries; feeds AI definitions	Glossary page	Low	Moderate

Funnel coverage today: decision stage partly covered (logos, certifications, contact); consideration stage missing (comparisons, how it works, pricing logic); awareness stage missing (guides, research insights).

Competitor comparison

BootWay has the strongest hospital proof of the three but the weakest search footprint. Iwayplus wins on third-party coverage, Accuras on content. Keyword counts and backlink totals need an SEO tool and are left out.

Dimension	BootWay	Iwayplus	Accuras	Winner
Content depth	1 main page (~1,000 words); inner pages 60–175 words	Own site did not surface in tests; iOS app listings do	5 blog posts of ~1,000–1,200 words plus product pages	Accuras
Publishing frequency	No blog; sitemap last updated Nov 2024	Not observed	5 posts, all dated 29 Sep 2025	Accuras (narrowly)

Dimension	BootWay	Iwayplus	Accuras	Winner
Third-party coverage	Print stories in Dainik Bhaskar (1 Oct 2026) and Rajasthan Patrika; no directory listings found	Inc42 profile; MapmyIndia stake covered by Inc42 and others (Jan 2026)	Not assessed in depth	Iwayplus
Appeared in test searches	Once, via the duplicate /landing.html, for a very specific query	Yes, via Inc42 news, for "indoor navigation company India hospitals"	Yes, for "indoor navigation without beacons QR code"	Iwayplus, Accuras
Named hospital proof	SMS, MG Hospital, CK Birla, RUHS; 18 lakh+ sq ft	No clients named in sources	No Indian clients named	BootWay
Positioning clarity	No app, no beacons, local languages; not yet in title or H1	Beacon- and sensor-backed maps	QR as a low-cost first step	BootWay, once it is on-page

Sources: Inc42 on Iwayplus, Inc42 on the MapmyIndia stake, Accuras blog.

The real rivals for hospital searches are news stories, not vendors. Queries about Indian hospital navigation return AIIMS Delhi's Disha app (Medical Dialogues), PGI Chandigarh's Margdarshan (Medical Dialogues) and the AIIMS Bhopal system. Pitch the same health-news outlets the SMS Hospital story; one online article there is worth more to AI visibility than several more print clippings.

Action plan

This week's fixes take about a day in total and remove every technical blocker; the quarter's work builds the pages and mentions that make Google and AI assistants name BootWay.

Quick wins (this week)

- [ ] **Rewrite the homepage title and meta description** using the copy in Ready-to-paste fixes. *Impact: High · Effort: 15 min*
- [ ] **Replace the sitemap** with every live `www` URL and today's lastmod; submit it in Google Search Console and Bing Webmaster Tools. *Impact: High · Effort: 30 min*

- [ ] **Add Organization + LocalBusiness JSON-LD** to the homepage. *Impact: High · Effort: 1 hour · Needs: LinkedIn, Crunchbase and Startup India profile URLs*
- [ ] **Claim or create a Google Business Profile** at LUB Skill Hub, Sitapura, with services "Indoor navigation" and "360° virtual tours", photos, and the exact same phone and address as the site. *Impact: High · Effort: 1–2 hours*
- [ ] **Fix /certifications:** add an H1 and a short text block per credential with issuer and date. *Impact: High · Effort: 1 hour*
- [ ] **Check Search Console:** pages indexed, URL Inspection on the homepage, PageSpeed Insights on mobile (watch the hero video's LCP). *Impact: High · Effort: 30 min*
- [ ] **Clean robots.txt** (Ready-to-paste fixes). *Impact: Medium · Effort: 10 min*
- [ ] **301-redirect `/landing.html`** to `/`, confirm `bootway.in` redirects to `www`, and set `og:url` to `https://www.bootway.in/`. *Impact: Medium · Effort: 30 min · Needs: hosting access*
- [ ] **Add a 10-question FAQ** to the homepage with FAQPage markup. Google rarely shows FAQ rich results now, but the Q&A text is exactly what AI answers lift. *Impact: Medium · Effort: 2 hours*
- [ ] **Fix the virtual tour subdomain:** title, one paragraph, link back to bootway.in. *Impact: Medium · Effort: 30 min*
- [ ] **Start the monthly AI-prompt log** with the 8 prompts above. *Impact: Medium · Effort: 30 min*
- [ ] **Add `/llms.txt`**, alt text on the 9 industry images, and delete the meta keywords tag. *Impact: Low · Effort: 30 min*

Strategic investments (this quarter)

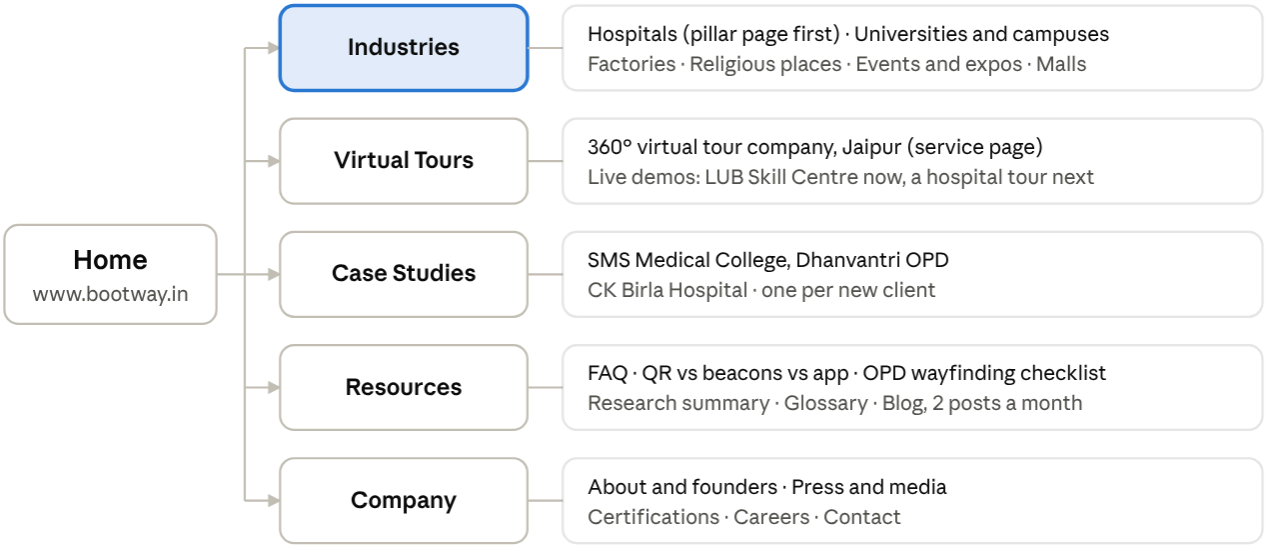

- [ ] **Move to a multi-page site** (structure below): Industries, Virtual Tours, Case Studies, Resources, Company. *Impact: High · Effort: 1–2 weeks of dev · Unlocks everything else*
- [ ] **Build the hospital cluster:** pillar page plus "QR vs beacons vs app", "OPD wayfinding checklist" and "Accessible routing". *Impact: High · Effort: 1–2 weeks · Needs: the new structure*
- [ ] **Publish two case studies** (SMS Medical College, CK Birla) with sq ft, floors, languages and an outcome or quote. *Impact: High · Effort: ~1 week each · Needs: client approval*
- [ ] **List BootWay on directories AI tools read:** SourceForge, G2, Capterra, GoodFirms, Clutch, Crunchbase, Tracxn, Startup India. Ask Gitnux-style list publishers to review BootWay. *Impact: High for AI · Effort: 2–3 days*
- [ ] **Get one online health-news story:** pitch the SMS LOI and 18 lakh sq ft milestone to Medical Dialogues, Digital Health News, Inc42 and YourStory; link the Dainik Bhaskar e-paper. *Impact: High · Effort: ongoing*

- [ ] **Launch the Jaipur virtual-tour service page**, then ask each client for a Google review. *Impact: Medium–High · Effort: 2 days*
- [ ] **Publish two dated articles a month** from the keyword table and turn each into founder LinkedIn posts. *Impact: Medium · Effort: ongoing*
- [ ] **Add Hindi versions** of the hospital page and FAQ with hreflang. *Impact: Medium · Effort: ~1 week*
- [ ] **Measure monthly:** Search Console impressions for hospital queries, AI-prompt log, demo requests from organic. *Impact: Medium · Effort: 1 hour/month*

Proposed site structure

Five sections replace the one-page site, hospital pages first

Proposed structure for www.bootway.in

proposed site structure · 5 sections

Industry pages carry the hospital cluster, Resources hold the comparison and FAQ pages AI answers quote, and Company holds the entity proof Google and AI tools cross-check.

Ready-to-paste fixes

Everything below can go live as written; replace the values in CAPS first.

Titles and meta descriptions

Page	Title (≤60)	Meta description (≤155)
Home	Indoor Navigation for Hospitals & Campuses, No App | BootWay	QR-based indoor navigation for hospitals, medical colleges and campuses in India. Turn-by-turn routes in local languages, no app or beacons. Get a quote.
/hospital-navigation (new)	Hospital Navigation System, No App or Beacons | BootWay	Guide patients from gate to OPD, lab or ward with QR-based indoor navigation in local languages. No app, no beacons. Book a demo with BootWay.
/virtual-tours (new)	360° Virtual Tour Company in Jaipur | BootWay	Explore a hospital, campus or venue online before you visit. BootWay builds interactive 360° virtual tours with place search and floor maps in Jaipur.
/certifications	Certifications: ISO 27001, DPIIT, PwD Validated | BootWay	BootWay is ISO 27001:2022 certified, Startup India DPIIT recognised and PwD accessibility validated. View the official certificates.
/research	Why Patients Get Lost in Hospitals: Research | BootWay	What studies say about signage, patient stress and wayfinding in hospitals, and what it means for administrators planning digital navigation.
/careers	Careers at BootWay | Indoor Navigation Startup, Jaipur	Join a Jaipur startup building app-free indoor navigation for hospitals and campuses. See open roles at BootWay.
lub.vt.bootway.in	Virtual Tour: LUB Skill Centre, Sitapura | BootWay	Walk through the LUB Skill Development Centre in Sitapura, Jaipur in 360°. A live demo of BootWay virtual tours.

robots.txt

Allows Google, Bing and every major AI crawler explicitly, keeps private paths closed, and points to the `www` sitemap. Named bots in one group follow only that group, so it repeats the Disallow lines.

```

Google does not use llms.txt; it is a low-cost extra for other AI tools.

First 10 FAQ questions

1. Do visitors need to download an app?
2. Does BootWay need beacons or Wi-Fi hardware?
3. How long does it take to map a hospital?
4. Which languages are supported?
5. How are routes updated when a department moves?
6. Does it support wheelchair and lift-only routes?

7. How is visitor data protected? (ISO 27001:2022)
8. What does indoor navigation cost for a hospital in India?
9. Can it work across several buildings or campuses?
10. Can you also build a 360° virtual tour of our facility?

Method notes and sources

Checked on 15 Oct 2026: homepage, `/certifications`, `/research`, `/careers`, `/policy`, `/landing.html`, `robots.txt`, `sitemap.xml`, `/llms.txt` and `lub.vt.bootway.in`, read as rendered text.

Not measured here, so verify:

- Google rankings and indexing: test searches ran on a non-Google engine. Confirm in Google Search Console.
- Page speed and Core Web Vitals: PageSpeed Insights could not be reached from this workspace.
- Keyword volumes and backlink counts: no SEO tool is connected.
- Raw HTML and redirects: schema "not detected" and the `bootway.in` → `www` redirect should be confirmed with the Rich Results Test and a redirect checker.
