

Every visitor finds their way. **No app. No asking.**

Bootway is app-free indoor navigation for hospitals, campuses, hotels, airports and places of worship: live, turn-by-turn directions to any room, counter or facility, right on the visitor's own phone.

What Bootway gives every visitor

Large premises are hard to navigate on a first visit. Bootway turns any building into a searchable, step-by-step map, so people spend their time on why they came, not on finding where to go.

Without Bootway

Visitors wander corridors, queue at help desks to ask for directions, miss appointments and feel anxious in unfamiliar spaces. People with disabilities often have to depend on someone else just to get around.

With Bootway

Visitors open Bootway on their phone, search a destination and follow a live blue route across floors, with no download, no signup and no need to ask. Everyone moves independently and with confidence.

No app to download

Visitors just scan a QR code and Bootway opens instantly on their smartphone. Nothing to install.

Turn-by-turn routes

A clear route line with live prompts like "Turn right towards the Spa & Wellness Center" guides visitors all the way.

Multi-floor navigation

Level switching from basement to top floor, with routes that carry across lifts and staircases.

Search, speak or tap

Type or say a destination, or pick a category such as OPD, Pharmacy, Restrooms or Dining.

360° and AR guidance

Visitors preview a space in 360° and follow on-screen arrows over the real view, so they recognise where they are going.

Time and distance upfront

"2 min (120 m)": visitors know how far away they are and reach counters and appointments on time.

Accessible to PwDs

Validated with Persons with Disabilities, who used Bootway smoothly and independently to move around a campus.

Safety at a glance

Emergency exits, restrooms and essential facilities are always one tap away, so no one is left searching in a hurry.

And for the venue that deploys it

Lighter help desks

Far fewer "where is...?" queries for reception and staff.

Smoother flow

Visitors reach departments directly, which eases corridor congestion.

Inclusive premises

Independent wayfinding for specially-abled visitors.

Secure by design

Delivered under an ISO 27001:2022 certified system.

Entrance to the exact door, in four steps

The same simple journey works in a hospital OPD, a university block, a resort or an airport terminal.

1

Scan the QR

At the entrance, the visitor scans a Bootway QR code and it opens on their own phone. Nothing to install.

2

Choose a destination

Search by name, use voice, or tap a category like Rooms, Dining, Restrooms or Emergency Exit.

3

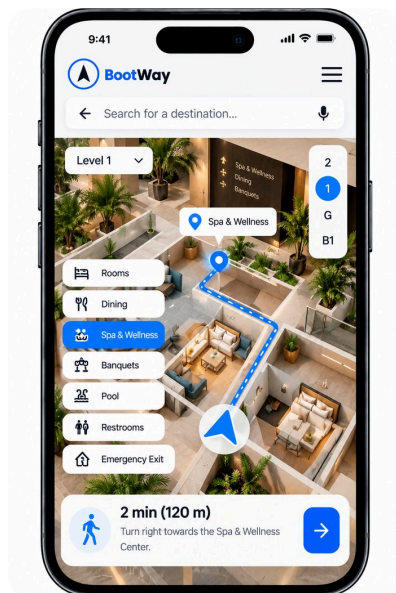

Follow the live route

A blue path shows the way across floors with turn prompts, walking time and distance.

4

Arrive with confidence

360° views and AR arrows confirm the right door, gate or counter before the visitor gets there.

Indoor, multi-floor route. Level picker, category shortcuts and turn-by-turn prompts.

Step 2

Categories built for your venue

Hospitals get OPD, Labs, Pharmacy and Billing. Hotels get Rooms, Dining, Spa, Banquets and Pool. Airports get Taxi, Bus and Car Rental.

Step 3

Clear, human directions

Each turn is spelled out, with a live ETA such as "Walk 3 minutes (200 m) to Pool & Spa".

Step 4

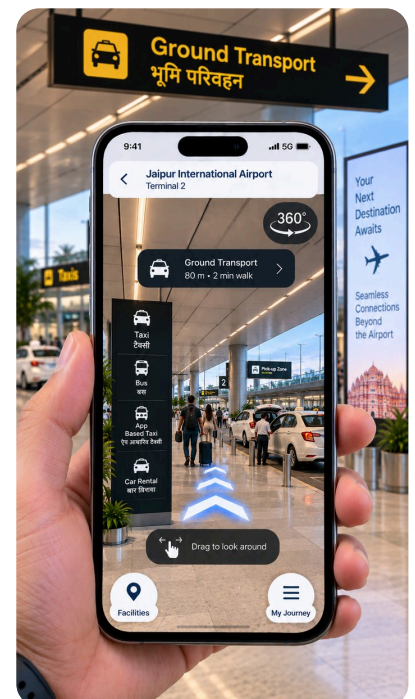

See it before you reach it

Drag-to-look-around 360° scenes and AR arrows overlaid on the real corridor.

Anywhere

Indoors and across campus

Seamless from building interiors to outdoor paths between blocks, gates and parking.

AR and 360° view. Bilingual (English and Hindi) guidance to Ground Transport, 80 m away.

Explore before arriving. Follow once there.

Bootway goes beyond a map. Visitors can preview spaces, tour rooms and walk outdoor campus paths, all from the same experience.

360° spaces

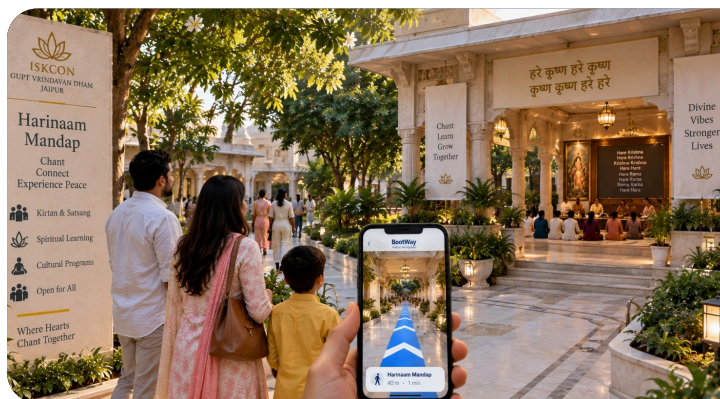

Drag to explore a lobby, reception or hall before walking in.

Virtual tours

Room views, 3D view and floor plans help visitors choose and orient.

Campus map and AR

Outdoor paths with time, distance and a one-tap "Start AR".

Screens and scenes shown are illustrative of Bootway's capabilities.

CROWDED VENUES, CALM VISITORS

Right path, even at peak hours

At busy temples, hospitals and events, Bootway guides families straight to the mandap, OPD or counter they need: "Harinaam Mandap, 40 m, 1 min".

One platform for any large, busy space

Wherever visitors arrive unfamiliar and in a hurry, Bootway gives them a calm, clear path.

Hospitals

Patients and attendants reach the right OPD, lab, pharmacy or ward without stress.

CK Birla Hospital · SMS Dhanvantri OPD

Campuses and training centres

Students, faculty and guests find classrooms, labs, offices and halls on day one.

LUB Skill Centre · Suresh Gyan Vihar Univ.

Real estate and offices

Buyers and visitors navigate sites, towers and amenities with ease.

Unique Builders (Unique Sanghi)

Hotels and resorts

Guests explore rooms, dining, spa and pool, and preview spaces in 360°.

Hospitality use case

Airports and transit

Travellers reach gates, taxis, buses and pick-up zones with bilingual AR guidance.

Transit use case

Temples and heritage sites

Devotees and families find mandaps, darshan queues and facilities during peak crowds.

Religious and tourism use case

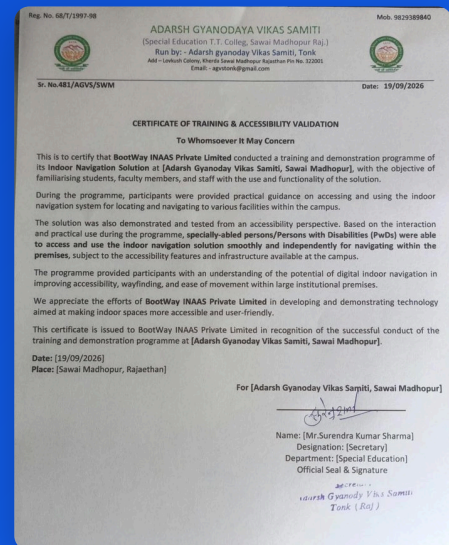

ACCESSIBILITY VALIDATED

Independent navigation for Persons with Disabilities

"Specially-abled persons/Persons with Disabilities (PwDs) were able to access and use the indoor navigation solution smoothly and independently for navigating within the premises."

Certificate of Training & Accessibility Validation, Adarsh Gyanodaya Vikas Samiti (Special Education T.T. College), Sawai Madhopur · Ref. 481/AGVS/SWM · 19 Sep 2026

- PwD training sessions delivered
- Tested with students, faculty and staff
- Step-by-step, easy-to-follow guidance
- Less dependence on assistance

सच्ची बात, बेधड़क

BootWay 18 लाख वर्गफीट क्षेत्र में पहुंचा, SMS से मिला एलओआई

जयपुर | अस्पतालों और बड़े परिसरों में मरीजों व विजिटर्स को रास्ता खोजने की समस्या का तकनीकी समाधान देने वाला जयपुर का स्टार्टअप बूटवे अब 18 लाख वर्गफीट से अधिक क्षेत्र में इनडोर नेविगेशन सिस्टम तैयार कर चुका है। अरनव शर्मा और समर्थ गुप्ता के नेतृत्व में विकसित सिस्टम के 4 से अधिक प्रोटोटाइप टेस्ट किए जा चुके हैं। BootWay की खासियत यह है कि विजिटर को नेविगेशन के लिए अलग एप डाउनलोड करने की जरूरत नहीं होती। मोबाइल पर वह किसी विभाग, काउंटर या सुविधा को सर्च कर टर्न-बाय-टर्न रूट देख सकता है। सिस्टम मल्टी-फ्लोर नेविगेशन के साथ 360 और AR आधारित गाइडेंस भी उपलब्ध कराता है। स्टार्टअप ने सीके बिरला हॉस्पिटल और लघु उद्योग भारती स्किल डवलपमेंट सेंटर सीतापुरा में अपने प्रोजेक्ट पूरे किए हैं। वहीं एसएमएस अस्पताल के धन्वंतरि ओपीडी से LOI प्राप्त हुआ है। इसके अलावा आरयूएचएस, सुरेश गान विहार विवि, महात्मा गांधी अस्पताल और युनिक बिल्डर्स आदि संस्थान में भी प्रोटोटाइप/प्रोजेक्ट किए गए हैं।

"BootWay reaches 18 lakh sq ft, receives LOI from SMS"

Headline, translated from Hindi

The report profiles Bootway as the Jaipur startup solving the problem of patients and visitors finding their way in hospitals and large premises. It notes the system was developed under the leadership of Arnav Sharma and Samarth Gupta.

- **18 lakh+ sq ft** of indoor navigation built
- **4+ prototypes** tested
- **No separate app** needed: visitors search a department, counter or facility and see a turn-by-turn route on their phone
- **Multi-floor navigation** with 360° and AR-based guidance
- **Projects completed** at CK Birla Hospital and the Laghu Udyog Bharati Skill Development Centre, Sitapura
- **LOI received** from the Dhanvantri OPD of SMS Hospital
- **Prototypes and projects** at RUHS, Suresh Gyan Vihar University, Mahatma Gandhi Hospital and Unique Builders
